Re: Request for Section 202(f) Determination – VELCO Windsor Substation Project

Dear Director Jordan:

I write on behalf of Vermont Transco LLC and Vermont Electric Power Company, Inc. (together, VELCO) to request a determination from the Department of Public Service, pursuant to 30 V.S.A. § 202(f), that VELCO's proposed Windsor Substation Project is consistent with the Vermont Twenty-Year Electric Plan. The Project involves upgrades to the existing VELCO substation located at 488 Hunt Road in Windsor, Vermont. To assist your review, an electronic copy of VELCO's petition for a Section 248 certificate of public good filed today with the Public Utility Commission can be downloaded from this link: [CPG Petition 12-20-2024](#).

As described in the accompanying materials, the Windsor Substation Project will improve reliability in a cost-effective, secure, and sustainable manner. The proposed upgrades are planned for an existing facility in an area that is presently impacted by electrical infrastructure to reduce ratepayer costs and potential environmental and aesthetic impacts.

Please do not hesitate to contact me should you have any questions about the Windsor Substation Project or this request. Thank you for your consideration.

Very truly yours,

Leslie A. Cadwell
